The application has been amended as follows:

On page 2 of the Specification: In line 5, "entitled" has been changed to – now Patent Number 6,743,153, titled--.

1. The following is an examiner's statement of reasons for allowance: The prior art of record fails to show or teach applicant's claimed methods for making a treadmill: As to claim 1 the treadmill having a frameless treadbase, front and rear support members, an arched deck, wherein the method comprises forming the arched deck such that when placed on a horizontal axis, the ends of the arched deck are positioned below the intermediate portion of the deck; and mounting the ends of the deck to the front and rear support members. As to claim 3 the treadmill having a frameless treadbase and the method comprises forming a deck; connecting the deck to front and rear supports which are independent of each other; and positioning an endless belt on the supports such that the belt can rotate around the deck. The "independence" of the deck is interpreted in accordance with page 9 of the Specification, as meaning that there is no frame which interconnects the front and rear support members; in essence the deck is the sole interconnection between the supports.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
